Global Solar Panel Recycling Market to Reach \$380.8 Million by 2027.

(GlobeNewswire) - Reportlinker.com announces the release of the report "Global Solar Panel Recycling Industry" - https://www.reportlinker.com/p06032941/?utm_source=GNW

1% over the analysis period 2020-2027. Monocrystalline, one of the segments analyzed in the report, is projected to record a 12.1% CAGR and reach US\$188 Million by the end of the analysis period. Taking into account the ongoing post pandemic recovery, growth in the Polycrystalline segment is readjusted to a revised 12.9% CAGR for the next 7-year period.

The U.S. Market is Estimated at \$43.9 Million, While China is Forecast to Grow at 17.2% CAGR

The Solar Panel Recycling market in the U.S. is estimated at US\$43.9 Million in the year 2020. China, the world's second largest economy, is forecast to reach a projected market size of US\$81.8 Million by the year 2027 trailing a CAGR of 17.1% over the analysis period 2020 to 2027. Among the other noteworthy geographic markets are Japan and Cana-

da, each forecast to grow at 9.2% and 11.4% respectively over the 2020-2027 period. Within Europe, Germany is forecast to grow at approximately 10.3% CAGR. Led by countries such as Australia, India, and South Korea, the market in Asia-Pacific is forecast to reach US\$55.9 Million by the year 2027.

Thin Film Segment to Record 16.1% CAGR

In the global Thin Film segment, USA, Canada, Japan, China and Europe will drive the 16.1% CAGR estimated for this segment. These regional markets accounting for a combined market size of US\$19.4 Million in the year 2020 will reach a projected size of US\$51.9 Million by the close of the analysis period. China will remain among the fastest growing in this cluster of regional markets. Latin America will expand at a 17.9% CAGR through the analysis period.

Select Competitors (Total 34 Featured) -
